

LCFT response to the Quality Standards

Referral to NICE concordant care in EIS

Sarah Wright

EIS RTT and
Quality
Standard
Improvement
Lead

Introduction

The journey of being a NICE QS Implementation Lead

- Incidence
- Stakeholder management
- Service design
- Business case

Incidence

- Ageless service
- Duration of Untreated Psychosis (DUP)
- Psymatic tool
- Co-morbidity
- Actual incidence
- Challenges of predicting At Risk Mental State (ARMS)

Stakeholder management

- Within EIS team
- Community MH services
- Inpatient units
- Regional / national picture
- Performance reporting
- Audits and readiness

Service Design

- Assumptions
- Guidance still not clear
- Role of Care Coordinators
- Involvement of medics in assessment
- CBTp versus CBT
- Links with other services or part of Early Intervention Service

Business Case

- Times of austerity
- Delivering with confidence or with risks
- Guidance unclear
- Challenging ourselves around efficiencies
- DNA / non-engagement
- Increased offer

Conclusions

All EIP services will be on their own journey

Workshops – chance to think about these four areas

We look forward to hearing your experience!
